

Examine effect of cone model, fixed spatial filter STA
 Upper Plots Compare Fits qualities for WN (left) and NSEM(right)
 Lower Plots Compare Change in WN to NSEM quality ratio

Purpose is to: Examine effect of cone model, fixed spatial filter STA
 UOP: Unconditioned Optimal Prediction, ie. the mean rate of the raster
 "Bits" refers to the (LogProb of Model – LogProb of Uniform Firing Rate)
 Symbol * is for OFF Parasol, Symbol . is for ON Parasol
 If bits are negative, consider model fail , replotted as zero
 Plot Date 31-Mar-2014 21:41:27
 Plot file: /Users/akheiman/Documents/MATLAB/temp_modelcompare/model_parameters/hack_plots
