

Purpose is to: Examine effect of ONOff Hard rectification channels in NSEM

UOP: Unconditioned Optimal Prediction, ie. the mean rate of the raster

"Bits" refers to the (LogProb of Model – LogProb of Uniform Firing Rate)

Each color is a different retinal prep

Symbol * is for OFF Parasol, Symbol . is for ON Parasol

If bits are negative, consider model fail , plotted as zero

Computation Date 28–Mar–2014 19:53:57

Plot Date 28–Mar–2014 19:55:50
