Purpose is to: Using NSEM: Examine effect of ONOff Hard rectification channels,no cone model
UOP: Unconditioned Optimal Prediction, ie. the mean rate of the raster
"Bits" refers to the (LogProb of Model – LogProb of Uniform Firing Rate)
Each color is a different retinal prep
Symbol * is for OFF Parasol, Symbol . is for ON Parasol
If bits are negative, consider model fail , plotted as zero
Computation Date 30–Mar–2014 21:04:32
Plot Date 30–Mar–2014 21:05:11
