Purpose is to: Show Cone model has minimal effect for NSEM fits
UOP: Unconditioned Optimal Prediction, ie. the mean rate of the raster
"Bits" refers to the (LogProb of Model – LogProb of Uniform Firing Rate)
Each color is a different retinal prep
Symbol * is for OFF Parasol, Symbol . is for ON Parasol
If bits are negative, consider model fail , plotted as zero
Computation Date 28–Mar–2014 19:41:49
Plot Date 28–Mar–2014 19:43:48
